

# The Greening of Greensburg

Suburban Lawn & Garden is honored to have supplied the citizens of Greensburg Kansas with a total of 198 large trees to help replace those lost in the devastating tornado that almost completely destroyed the town in 2007.

Greensburg's triumph of survival in the face of unbelievable adversity continues to be an example to us all, as the progress of this plucky little town continues to make news.

Large trees are an important contribution to the beauty, air quality, and ambiance of Greensburg, and all of us here at Suburban are proud to have been involved in this worthy project.
